# WHY HORNA?

## Look for the value in your origin

Horna is a small village that belongs to the municipality of Sigüenza (Guadalajara). Nestled in the Sierra Ministra mountain range, on the border with Soria, Horna has a spectacular landscape full of holm oaks and oak trees.

As if this were not enough, in the spot known by the locals as 'Fuentes del Jardín', the river Hernares has its source. Horna is thus the beginning of the famous Hernares corridor.
